

# Mazuri®

The Exotic Animal Feeding Resource

September 3, 2007

Dear Alpaca Salesperson and Customer Representative;

On behalf of the Mazuri team, I would like to inform you of a change being made to our **56CD MAZURI ALPACA GROWTH AND REPRO**. We have added beet pulp to the diet blend in order to increase the amount of high-quality fiber ingredients in the Mazuri Alpaca diets. This change was coordinated with Dr. Norm Evans, and has been tested for palatability at several facilities. The diet will look similar, with the addition of the beet pulp shreds to the blend, and palatability will generally be greater with this new addition. The Mazuri group is committed to meeting the nutritional needs of exotic animals and to customer satisfaction with our industry-leading products. If you have any questions or concerns about this product, or about any of our products, please feel free to contact me or anyone from the Mazuri team.

Sincerely,

Elizabeth Koutsos, Ph.D.
