FEEDING DIRECTIONS

Feed as the sole diet to growing goats from 30 pounds to market. Feed free-choice to high-producing goats on range or under dry lot conditions after they have acclimated to this ration. Also can be used as a creep feed and for conditioning animals prior to the breeding season.

These are only guidelines for consumption. Some goats may have a tendency to go off feed. When this occurs, feed long stem grass hay for two to three days then continue feeding **HONORä KIDGOAT GROWER**. Feed consumption will vary with life stage, environment and activity. Always provide adequate amounts of fresh, clean water.

Warning:

This product contains copper and should not be fed to sheep.

Caution:

Store in dry area away from insects.

Do not feed moldy or insect-infested feed to animals as it may cause illness, abortion or death.
