

If there were 124 hours in every day, I still wouldn't get everything done. So the last thing I want to do is make more work for myself when it's not necessary.

Strategy® horse feed takes the work out of feeding. It's perfect for every horse in the barn. The horses eat it, like it and get the nutrition they need from it.

And it's packed with an improved amino acid, vitamin and mineral mix to help keep the barn healthy without using supplements.

So why turn something easy into a chore? After all, there's more than enough work to get done as it is.
