

Complementing the Best that Nature has to Offer

Because today's horses are typically limited to pastures and grains which can have inconsistent and variable nutrient levels, horses need your help to achieve the nutritional balance they once derived naturally.

THAT'S WHERE NATURE'S ESSENTIALS® SUPPLEMENTS COME IN.

With extensive research and field testing, Purina Mills has designed Nature's Essentials® Supplements to help horses be more productive during their lifetimes. Nature's Essentials® Supplements help you balance the variable and missing nutrients in your forages and grains by using the highest quality natural ingredients to make sure your horses are getting all the nutrition they need for the lifestyle they deserve, while maintaining a diet lower in starch and sugar.
