Ultium Proof

I have used Ultium for 6 months now and have been 100% satisfied with its results. I tried Ultium because I had couple of horses that were unique.

The first horse I tried it with was a nervous horse in the stall. She just lacked confidence and was dependent on other horses. After feeding Ultium for a month she quieted down in the stall, quit pacing when alone and became more stable mentally. She then went on to become a good show horse.

When my sales rep told me it would quiet my horses down I was skeptical because everyone seems to be boosting of this lately but Ultium really did the job.

The other two horses I tried Ultium on were shown extensively this past fall. My sales rep told me Ultium would give my horses extra strength to go the distance. After being on the road showing constantly for the past 3 months I can say with confidence it is true.

My horses never lost weight; they remained strong and physically fit through thousands of miles traveled. They were shown in adverse conditions, and tested by making back to back reining runs in tie situations.

Through all of this these two stallions have become world champions, futurity and derby champions. I truly believe that these accomplishments would not have been possible without the help of Purina Ultium
