1. Growth performance can vary depending upon genetics, environment, management, facilities, and immune status. The above figures are estimates only and do not reflect a guarantee of performance.
2. Consider lowering protein and increasing energy when muscle becomes too extreme, body condition is too lean, or the pig has structural issues.
3. Add HONOR Showpig Paylean Premix at the 4.5 to 9 grams/ton level during the final 45 – 90 lbs of weight gain for faster growth and more muscle development.
4. Add HONOR Champion Drive Topdress at 1 lbs per day during the final 30 – 45 days for added top shape.
5. Deworm pigs thoroughly and effectively about every 30 to 45 days through the growing season.
