Mazuri Exotic Animal Nutrition is pleased to offer:

**5ZK4**

## **WILD HERBIVORE PLUS**

Wild Herbivore Plus is designed for browsing herbivores with higher energy demands. Wild Herbivore Plus is based off of our low starch, phosphorus-controlled Wild Herbivore diet (5ZF1), PLUS beet pulp shreds, molasses and soy oil. Together, these ingredients provide a highly palatable product with greater caloric density (as compared to Wild Herbivore).

The Wild Herbivore products have been designed and tested collaboratively with AZA institutions to provide the best possible nutrition for captive browsers. Wild Herbivore Plus is recommended for animals with poor body condition, or those animals with greater nutritional needs (e.g., growing or lactating). The diet is a blended feed and will have separate pellets and beet pulp shreds. It is important that feed be completely consumed to ensure optimal nutrient intake. We recommend feeding at 50% of the daily intake, on an as fed basis.

If you have any questions or concerns about this product, or about any of our products, please feel free to contact me. For information on this or any other Mazuri product, visit [www.mazuri.com](http://www.mazuri.com).
